Mark D. Krieger, M.D.

Dear Mr. Silver & Mr. Silverberg:

On behalf of the Division of Neurosurgery at Childrens Hospital Los Angeles, we would like to thank you for your support of the Gould Reception at the Foundry on Melrose earlier this month. Your participation is a reflection of your commitment to sustain one of the nation's largest pediatric neurosurgical programs — we perform over 700 surgical procedures and see 4,000 outpatients each year. It is your support that enables us to care for children as precious as little Josh Gould. We thank you.

Additionally, we are paving the way to developing innovative treatments for congenital and acquired brain and spinal diseases. In fact, our physicians are leading participants in the Children's Oncology Group, a nationwide research collaborative that promotes the investigation of new treatments for these devastating diseases.

We are well versed in caring for severely injured children. Armed with the latest technical equipment, the Division provides advanced surgical solutions, with outcome statistics that match or exceed any other program in the United States and beyond.

There's so much more we'd like to share with you and therefore want to extend a personal invitation to tour the Neurosurgery Division at Childrens Hospital Los Angeles — your visit would honor us sincerely. In the next few weeks, Jenny Davidson in the Foundation office will be contacting you to schedule a tour to highlight what Neurosurgery does to advance the healthcare of children. In the meantime, you can reach her at jdavidson@chla.usc.edu or (323) 361-1741 with any questions.

Thank you again for your commitment to the Division of Neurosurgery which allows us to continue our life-saving work.

Sincerely,

J. Gordon McComb, M.D.
Professor and Head
Division of Neurosurgery
Childrens Hospital Los Angeles
Department of Neurological Surgery
USC Keck School of Medicine

Mark D. Krieger, M.D.
Assistant Professor
Division of Neurosurgery
